

ATTENTION!

What about electric service?

Electric service will be a combination of either house power (supplied by the fairgrounds) or power provided by generator. An additional 10-gauge electric cord may be necessary if your motorhome cord does not reach the provided 30-amp receptacle. **A surge protector is highly recommended when plugging into the electric.** Limited electric service parking spots may be available upon arrival. Since power surges can be caused by a number of factors, **WMHA cannot assume liability for power surges or damages caused by such.**

If you need to cancel your request for electric, you must do so in writing on or before DECEMBER 18. Due to contract obligations, absolutely no refunds for electric cancelled after DECEMBER 18, 2017.

Generator-supplied electric service will be available Sunday JANUARY 7 at noon, or when parked in your final parking space using house power. Electric service ends at 10:00 a.m. on Sunday, JANUARY 14.

After paying for electricity, either through registration or at the fairgrounds, you will receive a windshield placard, which **"MUST BE VISIBLE"** from outside the coach at all times!

Although you may have a 30-amp connection, you WILL have numerous motorhomes on that line. There is not sufficient power to run the more sophisticated, high-tech equipment available today. Please be considerate of others and do not attempt to run electric water heaters or space heaters (use propane). Also, consider limited use of microwave ovens, toasters, and air conditioners.

Typical power requirements for appliances:

Coffeemaker	6-17 AMPS
Electric space heaters	8-17 AMPS
Microwave ovens	10-16 AMPS
Electric water heater	6-10 AMPS
Toaster	8-18 AMPS
Hair dryer	13-15 AMPS
Roof air conditioner	13-16 AMPS

THE POWER THAT GOES OUT COULD BE YOURS!

NOTES: Those who did not purchase electric cannot park in the electric supplied area. Generators are not to be operated in the electric area.
